## Associated File

Click the filename to download: [312ptd.exe](#) 168258 bytes 18Mar1998 04:52PM

## Abstract

This file contains the operating system patches for NetWare 3.12.

Changes since 312PTc.EXE - Removed the NTBIOFIX.NLM

## Installation Instructions

For detailed information on the fix information reference TIDs 2934544 & 2934545.

## Issue

### INSTALLATION INSTRUCTIONS

1. Extract the file on the SYS Volume.
2. At the server console prompt type "LOAD PATCH312".
3. At the prompt select "Copy OS Patches to Server".
4. At the prompt to Enter Patch Source Path type SYS:312PTC. (Or directory path where the file was extracted.)
5. Select EXIT when the file copy is finished.
6. DOWN and EXIT the server and restart.

[Follow Novell](#) [Request a Call](#) 44-1344-724000 [Print](#) [Feedback](#)

When installing a patch by using the console command, all files copied to the SYS partition will not retain the original file date and time. All files copied will obtain the current date and time. However, the "MODULES" console command will display the correct date and time as well as version of the modules.
